PREAMBLE:

Construction Industry Development Council (CIDC) was established by the Planning Commission Government of India (now reporting to NITI AAYOG) and Construction Industry, CIDC has emerged as the prime facilitating and support organization to provide various services to various Central, State Government Departments, Ministries, PSUs and Construction Industry Associates for the construction sector in India.

Over past two and half decades, CIDC has been an interface organization between the Government & Industry to ensure streamlining of the Construction Industry. CIDC's notable initiatives to develop and upgrade the Construction Sector includes skilling over 5 lacs youth and artisans for the Construction Industry, setting up and promotion of organizations for Dispute Resolution, High Technology etc.

CIDC is actively involved in fulfilling the National objectives of Skilling India, Swachh Bharat Abhiyan & several others and its operating is almost all the states in the country, including Tamil Nadu, North East, Odisha, Jharkhand, Rajasthan, Andhra Pradesh, Telangana etc.

IJM (India) Infrastructure Limited is one of the fast growing infrastructure company in India. The mission is to develop its human capital especially for the nation. To achieve the mission and objective of the development, IJM (India) Infrastructure limited have collaborated with Construction Industry Development Council (CIDC) to organize **“Employment linked training program for the project affected persons under CSR scheme for 50 suitable candidates”**.

TRAINING METHODOLOGY:

The training methodology is based on our field tested model which is an amalgamation of the classroom teaching (Theoretical) 20% and hands on training (Practical) 80%.

Classroom Training:

With a 20% exposure to this part, classroom teaching is conducted in designated classroom for different trades at Sites. The classrooms are well ventilated with proper lighting and facilities for labs and tool rooms.

Hands on Training / Onsite Exposure:

To enable the trainees to develop theoretical skill and prepare them for the intended jobs, 80% training focuses on providing hands-on-training to the trainees. The trainees are encouraged to pick up tools and work on site under the watchful eyes of their instructors. They are explained the nuances of handling their respective tools, to take necessary health and safety measures while using these tools and importance of respecting the environment in which they work.

Based on past experiences and training provided to a cross section of construction workers from different trades, the CIDC trainers are experienced in delivering on the entire construction value chain.

The course material and day to day activities are planned in such a way so as to create a maximum impact and enhance the overall learning experience of the participants. The queries and clarifications are happening both to the beneficiaries and the sponsor and regular reporting is maintained at all levels.

The training to be delivered will revolve around three key guiding principles of Construction—Safety, Quality and Productivities.

1. COURSE MATERIAL :

The trainees are provided training material specific trades in English and Hindi. Besides the course books the trainees can refer to various books, journals and magazines at the well-stocked library.

2. ASSESSMENT PROCESS:

With a view to maintain transparency and effective monitoring of program delivery, the evaluation and assessment process has been designed to include weekly assessment of the learners.

For this program, weekly written tests were conducted every Saturday for assessing the knowledge and skill of the trainees.
